

A geometric diagram showing a circle with a horizontal diameter. A vertical line segment passes through the center, with the top point labeled 'A' and the bottom point labeled 'Z'. An inscribed triangle has its top vertex at 'A' and its base on the circle. A point 'e' is marked on the vertical line segment between the center and 'A'. Several other lines are drawn from 'A' and from points on the circle's circumference, intersecting at various points. The diagram is drawn in a simple, hand-drawn style on aged paper.
